# Mobile applications addressing violence against women
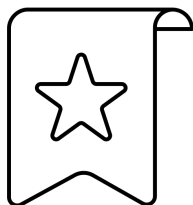

How did we proceed:

We have developed a new and innovative method for systematically analyzing and presenting app content.

Results:

A large proportion of apps that deal with violence against women focus primarily on one-off emergency or avoidance solutions as opposed to more preventative approaches.

What is special:

The article is the first systematic review of apps that address violence against women.

Eisenhut K*, Sauerborn E*, Garcia Moreno C, Wild V (2020) (*equal contribution): Mobile applications addressing violence against women: A systematic review. BMJ Global Health. 1. April 2020;5(4):e001954.
